

Improve your knowledge of the clinical management of poisoned patients

The UK National Poisons Information Service provides advice on the management of poisoning via its internet clinical toxicology database **TOXBASE®** and via a 24-hour telephone help line (contact details available in the BNF).

This clinical toxicology e-learning resource is provided for doctors, nurses and pharmacists in NHS hospitals and general practice, ambulance personnel, public health staff, NHS 111 / NHS 24 / NHS Direct staff and UK medical, nursing and paramedic students who wish to improve their knowledge of the clinical management of poisoned patients.

Module 1 – Using TOXBASE

Designed to assist new and existing **TOXBASE®** users to use the database more effectively.

Module 2 – Clinical management of the poisoned patient

- general aspects of poisoning
- problematic poisons
- common poisons
- drugs of misuse

The **TOXlearning** resource contains information on how to get started and how best to use the site. Users can work through courses at their own pace, save their work, obtain their scores and print off their results for continuing professional development files.

The **TOXlearning** resource is available independently of **TOXBASE®**. Access is free:
